POSITIONING REVIEW

BrainStorm

A behavior-change platform used by software vendors and IT teams to drive software adoption through communications, learning, and analytics.

brainstorminc.com

HERO SCORE

C

A first-time visitor cannot identify the primary audience, product type, or why it's better — without scrolling. The headline cycles through "partners. customers. end users. people." and the subheadline doubles down with "for everyone." BrainStorm is growth-stage (~$19M ARR) and can't afford vague brand messaging. Most critically, BrainStorm's own tagline is "Make AI work at work" and its #1 strategic priority is AI adoption — but AI appears nowhere in the hero.

FULL PAGE SCORE

C+

Scrolling adds useful context — the "one-part comms engine, one-part LMS, one-part analytics" description makes the product more concrete, and the Fishbowl stat (100-day go-live reduction, 14-point retention) is genuinely strong proof. But the three-audience structure (vendors / customers / partners) never resolves into a primary ICP, and the behavior-change angle doesn't surface until deep in the page. Testimonials, Awards, and audience tabs sections all dead-end without CTAs.

POSITIONING TABLE

QUESTION	HERO	FULL PAGE
Who is it for?	**Partially Clear** — "partners. customers. end users. people." names roles in a cycling animated way that signals everyone. No company size, industry, or specific buyer persona is mentioned.	**Partially Clear** — Three segments emerge (Software Vendors, Software Customers, Partners) with equal weight. BrainStorm's primary ICP — IT leaders at enterprises doing AI rollouts — is never explicitly called out.
What is it?	**Partially Clear** — "reach, train, and equip" signals training/enablement and "software success" anchors it to B2B. But the product category (DAP? LMS? comms platform?) is not identifiable from the hero alone.	**Partially Clear** — "One-part comms engine, one-part LMS, one-part analytics" makes the product more concrete. However, calling it "one-part LMS" is double-edged — LMS is precisely what BrainStorm is supposed to replace.
Why is it better?	**Unclear** — "A better way" promises improvement but names no comparator and provides no proof. No stat, outcome, or differentiator is visible above the fold.	**Partially Clear** — "Track the untrackable" and the Fishbowl stat (100-day go-live, 14-point retention) are strong. But the behavior-change ROI story — BrainStorm's real edge — is buried in section 6 and the testimonials carousel.
Clear comparator?	**No** — "A better way" vs. nothing. No named incumbent, no old process called out. The comparator is completely absent above the fold.	**Partially** — "The only platform that does it all" gestures at a comparator without naming it. The old way — separate LMS + email tools + manual tracking — is the real comparator and it's never made explicit.

ASSESSMENT

Product type

New Way — BrainStorm replaces a combination of LMS platforms, email campaign tools, and manual adoption tracking. The homepage hints at this but never frames the before/after contrast explicitly.

Implied comparator

Fragmented tools — separate LMS + email campaigns + manual adoption tracking. Never named explicitly on the page.

Positioning consistent?	**Partially** — A New Way product should frame the painful status quo before introducing itself as the replacement. BrainStorm hints at this with "reach the unreachable / track the untrackable" but never names the before/after contrast explicitly.

Hero CTAs: "Book a Demo" (primary — clear and action-oriented) | "Try for Free" (secondary — appropriate hierarchy) | Nav: "Demo" + "Try free" — both present and visually distinct.

Full page: Strong coverage in feature and pricing sections ("Learn more →", "See pricing →", "Meet with us"). Dead-ends: Testimonials carousel, Awards & Recognition section, and the "BrainStorm connects everyone in SaaS" audience tabs — none have CTAs.

POSITIONING GAPS

- **Hero says "for everyone" — a positioning gap that undermines the entire page.** HERO
  The headline cycles through four audiences and the subheadline explicitly says "for everyone." BrainStorm's primary ICP is IT leaders at mid-to-large enterprises doing AI rollouts — the hero needs to choose one entry point. "For everyone" only works as positioning when you're already Salesforce.

- **AI is invisible on the homepage.** BOTH
  BrainStorm's tagline is "Make AI work at work" and its #1 company priority is AI adoption — but "AI" appears nowhere in the hero and only in a footer content-pack link (Microsoft 365 Copilot). Every enterprise buyer is under pressure to show Copilot ROI right now. This tailwind is being left on the table.

- **The old way is never named.** BOTH
  As a New Way product, BrainStorm needs to frame the painful status quo (fragmented LMS + email campaigns + manual tracking) before introducing itself as the replacement. The homepage jumps to features without establishing what's broken — visitors who aren't already problem-aware will miss why this matters.

- **Behavior change — the real differentiator — is buried.** FULL PAGE
  "BrainStorm has cracked the code on end-user behavior change" appears in section 1 body copy, and the Fishbowl stat (100-day go-live reduction, 14-point retention) proves it — but these are two-thirds down the page. This belongs in the hero or in section 1 as the lead claim.

- **Three-audience structure dilutes ICP focus.** FULL PAGE
  Software Vendors / Software Customers / Partners receive equal real estate with symmetrical use-case tabs. The homepage can't simultaneously be the best page for a software vendor CSM, an enterprise IT leader, and a channel reseller. The primary ICP should lead; the others should be clearly secondary paths.

- **"One-part LMS" undercuts the differentiation story.** FULL PAGE
  Describing BrainStorm as "one-part learning management system" positions it alongside the platforms it competes against (Docebo, Cornerstone). If BrainStorm is better than an LMS, don't use "LMS" to

describe yourself — name the outcome instead (e.g., "one-part adaptive learning engine that actually changes behavior").

- **Testimonials and Awards sections dead-end.** FULL PAGE
  The testimonials carousel and awards block have no CTAs — missed conversion opportunities at two of the highest-credibility moments on the page. Even a "See how customers use BrainStorm →" or "Read case studies →" would keep visitors moving.

THE FIX

Hero Fix

The hero needs to pick its primary audience — IT leaders doing AI rollouts — and lead with the problem they're hired to solve. "For everyone" must go. BrainStorm's own tagline ("Make AI work at work") and its #1 company priority are AI adoption, yet AI appears nowhere above the fold. The behavior-change angle is the real differentiator and the proof point (or at minimum a stat) should be visible without scrolling.

SUGGESTED HEADLINE

Make AI actually work at work.

SUGGESTED SUBHEADLINE

BrainStorm drives real AI adoption — changing how employees work, not just giving them access to tools they don't use.

Full Page Fix

Restructure the audience section to lead with the primary ICP (IT / Enterprise AI Adoption) and make the vendor and partner paths clearly secondary. Then move the behavior-change proof — specifically the Fishbowl 100-day / 14-point stat and the Oracle CIO quote — into section 1 or 2, before the feature breakdown. These are BrainStorm's strongest credibility signals and they're currently buried two-thirds of the way down the page, long after most visitors have already left.

COPY REFERENCE

Hero

- **Headline:** "A better way to reach, train, and equip your partners. customers. end users. people."

- **Subheadline:** "Software success starts here—for everyone."
- **Primary CTA:** "Book a demo"
- **Secondary CTA:** "Try for free"
- **Social proof above fold:** None
- **Top nav CTAs:** "Demo" + "Try free" (both present and visually distinct)

Below the Fold Sections

- **Logo bar** — "Software vendors & customers trust BrainStorm" + 17 logos (Adobe, Microsoft, Google, PepsiCo, etc.). No CTA.
- **What is BrainStorm** — "one-part comms engine, one-part LMS, one-part analytics." CTAs: "Book a demo" + "Try for free"
- **The only platform that does it all** — comms / learning / analytics feature trio. No CTA. Dead-end.
- **BrainStorm connects everyone in SaaS** — three-audience tabs (Software Customers, Software Vendors, Partners) with use-case lists. No CTA to audience-specific pages. Dead-end.
- **Testimonials carousel** — Oracle CIO (Mark Sunday), Quickbase (Ashley DeKerlegand), Fishbowl CEO (Peter Osberg — 100-day go-live reduction, 14-point retention improvement). No CTA. Dead-end.
- **Why the world's leading companies choose BrainStorm** — three features (Adaptive Workflows, Scalable Personalization, Integrated Data). CTA: "Learn more →" on each.
- **BrainStorm solves your unsolvable problems** — "Reach the unreachable / Change the unchangeable / Track the untrackable." No CTA. Dead-end.
- **Awards & Recognition** — 6 award badges (MS Partner Award, Fortune Best Workplaces, Stevie Award, etc.). No CTA. Dead-end.
- **Pricing callouts** — Vendor pricing + Customer pricing. CTAs: "See pricing →" + "Get a BrainStorm overview →"
- **Migration & Transition Services** — content migration offer. CTAs: "Try it free" + "Meet with us"
- **See how it works** — demo request form. CTA: form submission.
- **Explore BrainStorm features** — 10-item feature carousel (Adaptive workflows, Admin portal, Triggers & branching, Events, Communications, etc.). CTA: "Learn more →" on each + "See all →"
